# Spotlight on T1

Our main goal as teachers is to help the children develop the skills they need to function more independently. The classroom has activities that are meant to foster all areas of development including the children's rapidly growing language skills. We love for them explore the classroom and playground freely as there is so much learning go on! Right now the children are excited about shapes and colors. We sing songs, do art projects and play color hopscotch or color toss as fun ways to practice what we have learned. The children have been introduced to a few letters and numbers and we will continue with that throughout the year. They are also able to sit at circle time a little longer which means we can do our first baking activity of the year!

Ms. Na'che't and Ms. Karen
